

USB Card Reader Family

USB CARD READERS FOR THE SOLUTION BUSINESS

ACCESS CONTROL FOR SECURE OUTPUT.

Are you already using proximity ID media as access control for your building or for time management? The very same ID media can also be used to give personalised access to output devices like printers and multifunction devices. Convenient for your employees, this simple measure can greatly enhance the security of your output environment and offers many options to improve efficiency.

Is your output environment secure?

Do you know which department is printing and copying how much?

Do you have a print policy, and how do you make sure that it is followed?

IMPROVE THE SECURITY OF YOUR OUTPUT ENVIRONMENT

- ▶ Use the same ID media that open your doors for access to your output devices
- ▶ One quick swipe - and your devices are at your service
- ▶ Increased security and cost control without disturbing your business
- ▶ Put an end to unclaimed documents in the printer tray: reduce waste and make sure that all confidential information remains confidential

The USB Card Reader Family

USB CARD READERS FOR THE SOLUTION BUSINESS

KYOCERA's card reader portfolio is designed for seamless integration of KYOCERA devices into existing security concepts. Swiping the ID media in front of the card reader, the user can logon to the device to access the device functions and retrieve printouts. The card readers can be used for local authentication without any additional software, or combined with server solutions for more advanced functions.

The USB Card Reader Family	Advantages
<ul style="list-style-type: none"> 7 USB card reader types that support prevailing transponder technologies (e.g. Legic, Mifare, HID) Delivery Contents: <ul style="list-style-type: none"> Card reader (selected type) USB cable for external mounting Card Authentication Kit License Certificate Optional Component: <ul style="list-style-type: none"> Snap-in holder to clip the card reader to the device 	<p>The card reader family is characterized by maximum compatibility and flexibility, to ensure that every customer's requirements are satisfied:</p> <ul style="list-style-type: none"> High compatibility with existing card technologies Extensive customization and scripting options Officially supported card readers for the KYOCERA portfolio of hardware and software
