Chapter 1 Policy Manager Installation

Installing Policy Manager Components	1-1
Installing a Printer Spooler Port on a Client PC	1-2
Installing Client Viewer on a Client PC	1-2

1 Policy Manager Installation

The installer provides an easy and intuitive process for installing and configuring **KMnet Policy Manager**.

Before installing KMnet Policy Manager, the .NET 4.0 Framework redistributable package and SQL Server Express 2008 R2 must be installed. This free software is in a separate folder or it can be obtained from the Microsoft website.

After selecting the Policy Manager programs and services on the **Products to install** page, you are taken to the **Installation Steps** section where you can select options to modify by clicking them in the left pane, or by clicking **Next**. At any point, you can complete the installation by clicking **Install now**. Any changes you make will be saved.

Note: **Client Viewer** and **Spooler Port** are on the menu only for informational purposes, with no options to select. However, instructions for installing these components are provided in the sections that follow.

After completing the installation, see the *User Guide* to configure Policy Manager operational settings.

Installing Policy Manager Components

To install **Policy Manager** components, follow these steps:

- 1** Copy the **Policy Manager** folder to your preferred server. Within the folder, double-click **KmInstall.exe** to start the installer.
- 2** On the **Manage products** page, click **Install**.
- 3** On the **Products to install** page, select the Policy Manager programs and services you want to install, or click **Select all**. The **Installation Steps** page is displayed where you can modify options for selected components in the left pane, or click **Next**. At any point, you can complete the installation by clicking **Install now**.
- 4** On the **Destination for all software** page, accept the default path displayed, or click **Browse** to select another location. Click **Next**.
- 5** On the **Certificate for KMnet Policy Manager Server** page, select **Use the default certificate**. Alternatively, you can choose the certificate provided by the network administrator by choosing **Select your own previously created certificate for SSL communication** and clicking **Browse**. Type the **Certificate password**. Click **Next**.
- 6** On the **Ports for KMnet Policy Manager Server** page, accept the default port numbers displayed, or type your custom **MFP port number** (printer port) and **KMnet Policy Manager port number** (server port). Click **Next**.

- 7 On the **Certificate for KMnet Spooler Server** page, select **Use the default certificate**. Alternatively, choose another certificate provided by the network administrator by selecting **Select your own previously created certificate for SSL communication**, then clicking **Browse**. Type the **Certificate password**. Click **Next**.
- 8 On the **Ports for KMnet Spooler Server** page, accept the default port numbers displayed. Alternatively, type your custom **Port number used by KMnet Policy Manager and KMnet Spooler Server** and **Eventing port number**.
- 9 To change additional Policy Manager component settings, click an option on the left pane, or complete the installation by clicking **Install now**.

Installing a Printer Spooler Port on a Client PC

To use the secure job release feature, the **Spooler Port** must be installed on each client PC.

To install the **Spooler Port**, follow these steps:

- 1 From the installation folder, copy the **Spooler Port** folder to the target computer.
- 2 Open the folder and run the **setup.exe** file.
- 3 On the first page of the installation wizard, click **Next** to use the default folder.
- 4 On the **Confirm Settings** page, verify that the installation settings are correct. Click **Install**.
- 5 On the **Installation Completed** page, click the **Start Spooler Port** check box to run the application immediately. Click **Finish**.

Installing Client Viewer on a Client PC

You can install Client Viewer on a client computer to let individuals view their personal job list and to delete jobs if needed. This installation can be performed at any time.

Before you can install Client Viewer, Microsoft .NET Framework 4 must first be installed.

- 1 From the installation folder, copy the **Client Viewer** folder to the target computer.
- 2 Open the folder and run the **setup.exe** file.
- 3 On the **Choose Destination** page of the installation wizard, click **Next** to use the default folder. Alternatively, click **Browse** and choose another folder.
- 4 On the **Confirm Settings** page, verify that the installation settings are correct. Click **Install**.

- 5** On the **Installation Completed** page, click the **Start application** check box to start Client Viewer immediately. Click **Finish**.
