

# A global approach to innovation.

Continuous innovation is a mindset that underpins everything we do within the organisation, one that puts innovation at the heart of our day-to-day business practices as:

## Responsible manufacturers

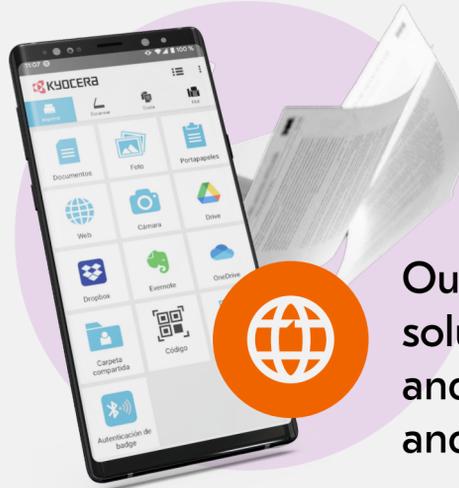

We develop energy-efficient devices that use minimal plastic parts.

## Technological pioneers

We leverage our expertise to innovate in new areas like production print and content services.

## Connecting worlds

Our devices and software solutions connect physical and digital documents and data.

## Leaders in sustainability

Our devices are built to last, while using minimal energy.

## Innovative partners

We design solutions based on customer challenges and opportunities.
